**Update 56**

-----

### ***Commissioning to commence on windfarm***

A major milestone will be achieved next week as we commence the commissioning phase/energisation of the Stockyard Hill Wind Farm, this involves commissioning individual turbines in the west and south sections of the project.

With the project being energisation all installed infrastructure, sub-stations, powerlines, and underground cabling shall now be considered electrically **ENERGISED** and **ALIVE**.

This commissioning process will continue for some months.

### ***COVID-19***

Goldwind is closely monitoring all restrictions being announced by the Australian and Victorian Governments regarding the response to the COVID-19 virus. As it presently stands, construction works across the state are permitted to continue, and we are proceeding with the construction of the Stockyard Hill Wind Farm.

However, there have been several measures implemented to manage the risks on the wind farm site, including:

- working in small consistent teams
- teams not socialising at breaks or in meetings
- increasing social distance within offices
- increasing hygiene practices
- self-isolation for any workers returning from overseas (enforced prior to the announcement of mandatory self-isolation)
- ensuring if employees/contractors are not well they seek medical attention and not attend the work site.

Obviously, we will act upon and manage any future directions from the Victorian or Australian Governments. The health and wellbeing of our employees, contractors and the broader community is of highest importance.
